Part 4.

## The Librarians<sup>es</sup> Nowadays.

Dear readers,

The librarians ~~were~~ appeared many years ago. Nowadays, libraries aren't popular, because you can download book from the Internet on your tablet or phone. I think it's bad very bad, because you can never feel that wonderful smell of book.

Modern librarians ~~are offer~~ <sup>their</sup> help for young readers. I think, that the future of librarians will ~~be~~ <sup>be</sup> bad, because everyone will forget about libraries and they'll read books from tablet. I think we have to read more books, which are wrote on paper.

Can you imagine what ~~will~~ <sup>there</sup> be in future? I do <sup>can</sup>. I think, that people in future will not even know about their culture. And I think, that they will never know their history. So you have to read books, wrote on paper.

Thank you for attention.
