There are many old people, who can be in danger not only outside, but also at their homes.

I think, the biggest part of elder people are unprotected and unable to defence themselves; most of them do not do exercises to keep fit, so they can be one of the <sup>50</sup> most unprepared victims.

The monitoring system, which has been was developed by Fujitsu, can protect and keep in safe old men, especially, if they are alone. I am admired by the work that <sup>has</sup> had been done, but that <sup>(unfortunately)</sup> can not help outside.

As said, the system, made by Fujitsu, can keep in safe <sup>100</sup> ty at home, but not outside, they should take care of their health, giving them special trainings.
