Nowadays more elderly people live alone without being cared of. This problem must be solved as soon as possible.

I consider that elderly people living alone should be taken care of without doubts. The ways of taking care can differ. I think, that children and grandchildren of such people should be the first helpers. If they have not got enough time they can keep a special person and pay for looking after the elderly.

Moreover, today there is a system which allows to watch them by analysing sounds. I suppose, in the century of modern technologies such developments are the big progress and can exist as well as computers. Probably, later we will not be able to live without inventions like those.

In conclusion, I can say that each of elderly people demands respectable attitude and relatives must understand it.
