Having parents as a teacher

In our time home education is getting popular. Many families prefer to teach their children at home instead of school. This kind of studying has a lot of advantages and disadvantages.

On the one hand, it could be more comfortable for those people, who ~~are~~ are always busy because of their additional lessons or sport, so they can make their schedule by themselves. Therefore, this kind of studying is better for disabled people, because socializing is a real issue for them. Moreover, it is help to avoid school-bullying or making conflicts with teachers.

On the other hand, we cannot say how good children's parents will educate them. Although, ~~for~~ it will be a real problem for this pupils who are studying at home to make friends and build relations in the future.

In my opinion is better to study at school than at home. For some people is hard to manage ~~their~~ their time during the day. Also, ~~my~~ parents and repetitors ~~can't~~ cannot teach the standards that are using in the school.

In conclusion, I want to say ~~(that everybody should choose by their own, what type of education they would prefer.)~~

that it is hard to ~~say~~ ^{mean} what type of education is better, and everybody should choose by their own what is more convenient for them.

$$1+1+2+0+1=64$$
