# Problem of home studying

Some parents teach their children at home rather than sending them ~~to~~ school. Maybe they think they can teach their children better, than in school, or maybe they think that in school children can learn something terrible. In my essay I will try to understand: "Is home studying good or bad for the children?"

So, if we talk about arguments for the home studying, we can say, that some parents really can teach their ~~parents~~ children themselves, doing it better, than teachers in school, because it is their own ~~at~~ children and parents are more interested in children's education, than school teachers. And do not forget about bad companies in schools, that can teach your child something incorrect.

But on the other hand <sup>P</sup> we can see children, who not prepared <sup>gr</sup> to be grown up. They do not have a lot of friends, because they sit at home almost all the time. They do not know, how to live in society, because there is <sup>gr</sup> a few people they need to talk. A long story <sup>lex</sup> short, when they will <sup>gr</sup> need to go in <sup>gr</sup> society, their mental health could be crushed.

As we can see, there is not one answer <sup>gr</sup> on our question about home studying. ~~Someone~~ Someone could say "it is horrible", someone could say: "it is okay". In my opinion, it is better to go to school, than to study at home.
